Subject: Microsoft Settlement

I am writing to give my comments on the Microsoft antitrust settlement.

I oppose the proposed Microsoft anti-trust settlement.

Microsoft's anti-competitive practices are inconsistent with both American free-enterprise and American law. These practices weaken competition and restrain innovation. The resulting less efficient market employs fewer Americans and produces fewer products. The products that are produced are of lesser quality but higher cost than could be produced in a more efficient and competitive market.

The proposed settlement is too weak. The proposed settlement should be discarded; a new settlement, if sought, should punish Microsoft severely enough to dissuade it from engaging in anti-competitive behaviors in the future.

Thank you,

Roger Michael Seip
